

# RED ROSIN FLOORING PAPER

## WHAT IS IT?

Red rosin flooring paper is an uniform flexible felt of organic fibres, impregnated with red organic dye. This high-quality, heavyweight building paper can be used for a protective covering and liner. The fibers are set in alum to resist bleeding. It's primary function is to reduce the friction that occurs when the flooring slides against the subfloor, allowing the wood flooring to slide together more easily.

## USES

Red rosin paper is useful in a wide variety of construction applications including roofing, flooring and as a general job site protective covering. When used as an inner liner in wall, roofing or wood flooring applications. Red rosin paper acts as a separation barrier, protecting against wind and dust infiltration while minimizing squeaks.

*Great for  
hardwood  
floors!*

## FEATURES & BENEFITS

- Economical protective covering over new floors, prior to completion- Saves time.
- Covers gaps in jointed construction- Tightens up the structure.
- Specially designed to resist bleeding- Safe to use.
- Good general purpose job site protective utility paper- Multiple uses.
- Coats nails as they are driven through the flooring, sealing the nail as it's driven
- Paper is manufactured from 100% recycled fibers- Environmentally friendly

## SURFACE PREP

Clean surface of all dust, dirt and debris prior to installation.

## PACKAGING

36" wide x 167 feet long  
(.91m wide x 50.90m long) Rolls

## PHYSICAL PROPERTIES

Roll Size	36" wide x 167' long (.91m x 50.90m) 500 sq.ft./Roll (46.45 sq.m./Roll)
Roll Weight	15 -17 lbs./Roll (6.8-7.7 kg/Roll)
Thickness	9.0 - 11.5 mils
Weight	3.0-3.4 lbs./CSF (141-166 grams/sq.m.)
